DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 16 – 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Roe et al. (US 6,093,869).

With reference to claim 16, Roe et al. (hereinafter "Roe") discloses a method for making an absorbent device comprising the steps of: a) manipulating a resilient member having a first arm having a rough surface and a second arm into a strained configuration; b) applying a restraint to maintain the resilient member in the strained configuration, forming an indicator structure, the restraint being capable of weakening upon exposure to moisture and the resilient member is capable of articulating to a relaxed configuration upon the weakening of the restraint in a movement in which the rough surface of the first arm traverses the second arm to generate vibration discernible to a user; and c) forming an absorbent body containing the indicator structure as set forth in col. 29, lines 21 – 53.

Art Unit: 3761

As to claims 17 and 18, Roe discloses a method wherein the step of forming the absorbent body comprises forming the absorbent body around the indicator structure or wherein the step of forming the absorbent body comprises forming the absorbent body and inserting the indicator structure into the absorbent body as set forth in col. 12, line 54 to col. 13, line 3.
